Real People. Real Savings. Real Fast.®

MODEL: SH2V AIR HANDLERS

Energy Savings – The high-efficiency, variable-speed blower motor used on the SH2V, when matched with a two-stage air conditioner or heat pump, will run at a lower speed the majority of the time. This provides even temperatures so there is no need to continuously adjust your thermostat – reducing your energy usage.

Designed for Performance – Sure Comfort air handlers have a factory installed indoor aluminum coil, which is the key component for your air handler. The coil is essential to humidity control and improved system performance, and the high-quality standards used in manufacturing result in fewer maintenance calls. Other quality features include a new lanced fin design and condensate drain pan. The corrosion-resistant aluminum endplates keep your unit looking as good as it runs.

Quiet Operation - SH2V Air Handlers are designed with a sturdy steel cabinet and one inch of foil-faced insulation, offering excellent thermal and sound insulation.

Sure Comfort® is a new name in home comfort offering tried and true air conditioners, heat pumps, furnaces and air handlers and package units to meet the needs of your family and your budget. With advanced features, impressive performance and great warranties that all come standard, you can enjoy solutions that keep your family comfortable every day.
